Influenza Immunization Drug Cards – Prince Edward Island (2018/19)

With the introduction of our Influenza Immunization module, some significant changes must be made to the drug cards for the Influenza Immunization products your pharmacy uses.

The immunization formulary you have been provided may include drug records that already exist in your system; if this is the case, duplicate drug cards will be inserted in your system. Manual changes must be made to the correct drug card to ensure the correct product is selected when documenting and billing immunizations.

It is your responsibility to ensure the values in the Influenza drug cards are set as follows and that duplicate drug cards are managed appropriately.

Identifying Duplicate Drug Records

1. Search for an Influenza immunization drug. If there are duplicate drugs in your system, multiple records will appear in the drug search screen.

In the example below, there are three drug records in the system associated with DIN 02420643.

The screenshot shows a search interface with the following details:

- Search Criteria: 02420643
- Searching By: DIN
- Records Found: 3
- Advanced Search options: Show Packs (All selected), Generic Name, Drug Group, Drug Price Group, Form, Manuf, Sched, Show All Drug Pack Tiers (checked).

#	BrandName	GenericName	Strength	Pack Size	DIN	Form	Manufacturer	On Hand
1	Fluzone Quadrivalent		15mcg	5	02420643	ML (Suspe SAO (Sanofi Pasteur Limited)		
2	Fluzone Quadrivalent		15mcg	0.5	02420643	ML (Prefill SAO (Sanofi Pasteur Limited)		
3	Fluzone Quadrivalent Influenza Vaccine (GOVNT)		15mcg	1	02420643	ML (Syring SAO (Sanofi Pasteur Limited)		

- Call up each drug record that **does not** have the correct pack size and uncheck the **Pack Active** flag.

General	Ordering	UPCs	Plans	Usage	Old Costs	Counselling	Kroll Care
Packs (1)	(F2) (Ins) (Del)	Pack Size	1	<input checked="" type="checkbox"/> Pack Active	<input type="checkbox"/> Front Store		
		Quick Code		<input type="checkbox"/> Only allow manual price changes			
		Purchase	\$0.00	Default Vendor	Default (McKesson)		

- When all duplicate drug records have been inactivated, these drug records will not appear in the drug search results unless you perform an advanced search for all packs; inactive drug packs will appear in red text.

- Because last year's immunization products are recorded under a pseudo-DIN, you should also search for each of this year's products by drug name (not by DIN) and inactivate the drug cards for last year's products.

In the example below, there are two Fluviral drug records in the system. This year's product uses the correct DIN and last year's product is recorded under a pseudo-DIN.

File	Edit	Recent	Search	Utilities	NH	Cards	Session	Help

- Call up the record that uses the pseudo-DIN and inactivate it. Note that drug records that use a pseudo-DIN will show **General Fee For Service** in the **Fee for Svc.** field.

The screenshot shows a software interface for managing drug records. The main window is titled 'Fluzone Quadrivalent Influenza Vaccine (GOVN1)'. The 'Fee for Svc.' dropdown menu is highlighted with a red box and currently displays 'General Fee For Service'. Other fields include 'PDIN - Pseu' (93899895), 'Strength' (15/15/15), 'Sched 2 (Schedule)', 'Form' (ML (Suspension)), 'Route' (Intramuscular), and 'Price Group' (NS Fee For Service). The 'Pack Active' checkbox is also highlighted with a red box. The interface includes a menu bar (File, Edit, Recent, Drug, Reports, Utilities, NH, Central Fill, Cards, Session, Help) and a toolbar with buttons for 'F3 - Patient', 'F5 - Drug', 'F7 - Doctor', 'F9 - Workflow', 'F11 - Drop-off', 'F12 - New Rx', and 'Alt+X - Start'. There are also buttons for 'OK', 'Save', 'Scan', 'Drug Sub', and 'Clear'.

Fluzone Quadrivalent - Pack Size 0.5

Before you begin setting up the drug card, ensure you have inactivated all duplicate drug packs in your system. See the [Identifying Duplicate Drug Records](#) section for more information.
