

Kroll Version 10 Service Pack 8 Updates and Enhancements

This document outlines the new features that have been implemented in Kroll Version 10 Service Pack 8 and summarizes the changes that have been made.

NOTE: The electronic version of Ontario MedsChecks will NOT be available in this program update and it is NOT compliant with the new requirements. A fully compliant electronic version will be available in early 2017. See the Ontario MedsCheck manual on our website for more information.

General

New MedsCheck forms (Ontario)

New forms have been added to the paper-based MedsCheck functionality. Note that electronic forms will be temporarily unavailable until early 2017. In the interim, users must print and rescan the new mandatory MedsCheck forms.

Drug Benefit Claim/Reversal form embedded and pre-populated (Ontario)

The ODB Drug Benefit Claim/Reversal PDF form is now embedded in Kroll with all of the necessary fields pre-populated.

Dispensing allowed, Administration periods in F12 > Dates tab

The Dates tab in the F12 - Rx screen has been modified so separate dispensing and administration start/stop dates can be specified.

'Single Use Only' subplan

A 'Single Use Only' subplan has been created. This allows users to configure a single use plan to handle plans that can be used on a single fill only.

'Print drug expiry date for ...' configuration setting

A 'Print drug expiry date for... Non-mixtures/Mixtures' configuration setting has been added to the Store Level Configuration Parameters screen (File > Configuration > Store > Labels > 2 - Vial).

'Retain this document ...' option added to Document Scan Reconciliation screen

Users can now specify how long a document is to be stored when scanning it in using the Document Scan utility.

Patient Cards

Cropping functionality added to patient images

Users can now crop patient images in the Patient Picture form, allowing cropped portions of patient images to be used as the patient picture.

'Patient Type' field added to advanced patient search

A Patient Type field has been added to the F3 - Patient advanced search screen.

'Print Wallet Card' option added to Patient menu

A Print Wallet Card option has been added to the Patient menu in the patient profile.

Reports, Labels, Hardcopies

Prescriber license number on Pharmacomm, Tricomp, and Tricomp (Short) thermal hardcopy labels (British Columbia)

In British Columbia, the prescriber's license number now prints on the Pharmacomm, Tricomp, and Tricomp (Short) thermal labels.

Bin Management History Report

A Bin Management History Report has been created, allowing users to track the movement of items to and from their various pickup bins.
